Projects

Login Screen App – Swift

Developed a responsive login interface using Swift and UIKit, featuring secure text input handling and adaptive layouts.

[GitHub](https://github.com/aydgnme/Swift-LoginScreen)

Tip Calculator App – Swift

Built a lightweight tip calculator app for iOS using Swift, focusing on user-friendly UI and dynamic state management.

[GitHub](https://github.com/aydgnme/TipCalc)

React Native Jobs App – React Native, JavaScript

Created a mobile job listing application with React Native, implementing real-time data fetching and responsive design.

[GitHub](https://github.com/aydgnme/react-native-jobs)

Front-End Developer Capstone Project – React.js, TypeScript

Developed a fully responsive front-end web application, showcasing modern design principles and component-based architecture.

[GitHub](https://github.com/aydgnme/Front-End-Developer-Capstone)

Rent-a-Car Management System – Java, C#

Designed and developed a car rental management system for university coursework, implementing backend services and client-side interactions.

[GitHub](https://github.com/aydgnme/Rent-a-car-PIU)

About Me

Curious by nature and driven by technology, I am passionate about building products that make people's lives easier. I thrive in dynamic environments and continuously seek opportunities to expand my technical and creative skill sets.
